## ADDENDUMS AND ATTACHMENTS

1. ORIENTATION SCHEDULE
2. REQUEST FOR LEAVE – RESIDENTS FORM
3. TRAVEL PLANNING WORKSHEET
4. RESIDENT PERFORMANCE EVALUATION FORM
5. RESIDENT RESEARCH PROGRESS REPORT
6. BENEFIT SUMMARY SHEET – CLINICAL INSTRUCTOR-HOUSE STAFF
A. PREFACE

Post-DVM residency training programs in the Department of Veterinary Clinical Sciences at The Ohio State University provide advanced and intensive training in the principles and practice of specialty veterinary medicine. The Faculty of each Service provides the day-to-day oversight and training of our Residents, while the Post-Professional Education Committee (PPEC) serves as the administrative unit for Resident clinical training and graduate studies.

This handbook serves as a reference for both Residents and Faculty regarding the rules and policies of the Department of Veterinary Clinical Sciences, the College of Veterinary Medicine, and The Ohio State University that pertain to all Residents within the Department. In addition, Residents should receive and be familiar with the guidelines and policies of their specialty as outlined in the Specialty Service Residency Program Descriptions. As all Residents within this Department are also required to pursue post-DVM masters or doctoral degrees, they should also receive and be familiar with the rules and policies relative to graduate studies that are detailed in the College of Veterinary Medicine Graduate Program Handbook and the Graduate School Handbook of The Ohio State University. (See Section M. below)

The training, mentoring and advising of Residents through 3 years of clinical specialty training and their MS/PhD degrees is a primary mission of the Department of Veterinary Clinical Sciences to which the Faculty is deeply committed. This Residency Program Handbook (along with the Specialty Service Residency Program Description, CVM Graduate Program Handbook, and OSU Graduate School Handbook) provides the framework for all Residents to successfully complete their residency program, and for Faculty to advise their Residents through successful completion of the residency.
B. MISSION, VISION, CORE VALUES, AND GUIDING PRINCIPLES

1. Mission

The mission of the Department of Veterinary Clinical Sciences is the advancement of animal health and well-being through providing exceptional educational experiences, delivering outstanding veterinary care, and discovering innovative methods to diagnose, prevent and treat disease. In support of these activities, we manage comprehensive professional and post-graduate curricula, provide leading-edge veterinary medical care, engage in consultation services and outreach activities that benefit the public and veterinary profession, and perform meaningful clinical, basic, and translational research for the improvement of animal and human health.

2. Vision, Core Values, and Guiding Principles

Our vision is to create and maintain academic, clinical, research, and outreach programs that are recognized nationally and internationally for their quality and innovation. While striving toward this vision, we are mindful of values that guide our personal and collective works. Central to these are intellectual integrity, professionalism, innovation, commitment, accountability, and a drive for excellence. These core values are representative of the standards and principles we embrace individually and collectively.

a. Group Values and Principles

- **Commitment to Programmatic Growth** – we will develop and advance our programs for the benefit of our students, animal health, and the profession
- **Commitment to Public Service** – we serve the public through outstanding patient care, consultation, continuing education, and outreach
- **Commitment to the Profession** – we serve our profession through consultation, engagement with professional societies and governing bodies, and by provision of continuing education
- **Commitment to our Students** – we believe that the education of our professional and post-graduate students is paramount
- **Discovery** – we strive to find better ways to improve animal and human health through clinical, basic, and translational research
- **Impact** – we perform meaningful research that impacts and enhances animal health and veterinary medical care
- **Inclusiveness** – we value and encourage the participation of all members of our team in discussion and decision-making
- **Innovation** – we advance our academic and clinical programs through personal creativity and collaborative innovation
- **Inspiration** – we motivate our students to embrace our profession and to explore the many opportunities available to members of our profession
- **Involvement** – we understand that our personal engagement in Department, College, and University programs and service is pivotal for advancement of our Department goals
- **Leadership** – we are active in our academic, hospital, and specialty communities
- **Programmatic Goals** – we emphasize performance and outcomes as benchmarks of academic and clinical success
- **Quality** – we strive continuously for excellence in our teaching, research, clinical practice, service, and outreach efforts
- **Responsibility** – we recognize our collective responsibilities for careful management and strategic optimization of resources
- **Teamwork** – we recognize that programmatic success depends on each of us working together selflessly towards our collective goals
b. Personal Values and Principles

- **Accountability** – we are answerable for our individual actions and responsibilities
- **Balance** – we seek an appropriate work-life balance
- **Clinical Expertise** – we strive to maintain and advance our clinical expertise
- **Collegiality** – we foster positive, collaborative relationships and interactions with Faculty, colleagues, staff, and students
- **Communication** – we engage in honest, forthright, issue-oriented, and civil dialogue
- **Compassion** – we treat our patients, students, and colleagues with understanding, empathy, and kindness
- **Composure** – we maintain a professional comportment during stressful events
- **Contribution** – we understand that our individual engagement and involvement in programs is critical to both programmatic and personal success
- **Efficiency** – we aim to improve our delivery of care and services while always maintaining focus on the quality of our work
- **Enthusiasm** – we value and foster enthusiasm and positive thinking
- **Ethics** – we embrace the importance of both personal and professional ethics in our work, behavior, and lives
- **Hard Work** – we value individual initiative and personal dedication to the job
- **Humor** – we believe that appropriate humor can enhance the work environment and help people connect
- **Inquisitiveness** – we value curiosity and seek understanding
- **Integrity** – we approach academic issues, research, and patient-care ethically and with intellectual honesty
- **Learning** – we embrace life-long learning
- **Loyalty** – we value loyalty to our collective ideals, programs, and colleagues
- **Open-mindedness** – we listen and openly and fairly consider new ideas or other viewpoints
- **Optimism** – we balance introspection, analysis, and constructive criticism with a positive attitude and outlook regarding our programs, profession, and people
- **Passion** – we sincerely care about our programs, students, colleagues, patients, and clients
- **Persistence** – we celebrate diligence and determination
- **Professionalism** – we honor colleagues whose behavior reflects credit on our profession
- **Reflection** – we accept constructive criticism and hold personal accountability as pivotal to programmatic success and professional development
- **Respect for Differences** – we recognize, respect, and value diversity as a source of strength
- **Satisfaction** – we believe that learning and working together create many opportunities for professional gratification and personal enjoyment
- **Service** – we embrace a “customer-oriented” approach in the delivery of patient and client care
- **Trust** – we appreciate that learning to trust each other is a fundamental step in achieving our vision of programmatic distinction

D. OBJECTIVES AND EXPECTATIONS OF RESIDENCY/GRADUATE PROGRAM

It is the objective of the Department and its Faculty to provide the facilities, case material, mentoring, and training that allow each Resident to develop comprehensive knowledge, expertise, and proficiency in their specialty. Successful completion of the residency program will satisfy the credentials requirements of the specialty colleges and will afford each Resident the opportunity to be thoroughly prepared for their specialty College Board certifying examinations.

Residents share in the responsibility of the Faculty to provide exceptional educational experiences for our professional students and outstanding clinical services to our constituents. Residents are expected to contribute to the mission and function of their Service, the Veterinary Medical Center, and the Department of Veterinary Clinical Sciences, and to abide by the policies and rules of each.

1. Clinical Service

An integral and major element of the clinical residency training program is undertaken in the Specialty Clinical Service, delivering outstanding veterinary care to our patients and professional service to animal owners and referring DVMs. Our Faculty clinicians will provide expert and direct supervision of clinical duties and responsibilities as Residents develop the knowledge, skills, and expertise expected of a specialist. Specific day-to-day clinical duties are detailed in each Specialty Service Residency Program Handbook.

2. Graduate Program

All Residents will be enrolled as Graduate Students of the Graduate School of The Ohio State University and will complete either an MS or PhD degree. These graduate degree programs are an integral component of our residency training. The Department offers a comprehensive selection of graduate courses taught within the Veterinary Medical Center and coordinated so as to have minimal impact on clinical service responsibilities and opportunities (See Section G. below). Tuition fees for MS graduate courses are supported in full by the Department; tuition fees for Residents pursuing PhD degrees may be funded by the CVM Graduate Program.

Degrees are awarded to students who have demonstrated the ability to successfully perform significant original independent research in any of the areas of specialization within the Department of Veterinary Clinical Sciences, AND who have presented the results of their research orally and in writing to their peers and colleagues, AND who have completed all graduate coursework requirements. It is expected that the results of this research will eventuate in the publication of at least one (1) manuscript in a peer-reviewed journal.

To facilitate research opportunities, Residents are given time off clinics each year during which they are free from scheduled clinical service duties and clinical case responsibilities to pursue these and other scholarly activities (See Section H. below). Specific requirements regarding didactic coursework, courses offered, etc. may be found in the CVM Graduate Program Handbook.

Further, in support of Residents’ research studies and the Department’s commitment to fostering applied clinical research, all Residents are expected to attend the Department Research Seminar held monthly on the 1st Monday of the month from 8:00 – 9:00 a.m. NOTE: The Chair of the PPEC generally meets with the Residents for 30 minutes prior to the Research Seminar (i.e. at 7:30 a.m. in the VMC Auditorium). This meeting is mandatory for Residents to attend.
3. Teaching

Teaching opportunities can be an important part of the training in both the clinical residency and the graduate program. Teaching responsibilities will include clinical teaching to senior veterinary students assigned to the Service as well as participating in teaching technical skills to junior veterinary students during laboratories. Depending on the interest of the Resident and the needs of the Service, Residents may have the opportunity to develop lecture skills by preparing and delivering selected formal classroom lectures to professional students.

Successful completion of a residency and the award of a Residency Certificate are dependent on completion of the 3-year clinical residency training program, as well as attainment of either an MS or PhD degree.
E. QUALIFICATIONS AND APPLICATION REQUIREMENTS

1. Resident Candidate Requirements

Applicants must be graduates of an AVMA-Accredited or Faculty-approved College or School of Veterinary Medicine and must have completed a one-year rotating internship or acceptable equivalent clinical experience. Potential Resident candidates should review the Specialty Service Residency Program Description for any further specific requirements pertaining to each program/specialty, and must provide all other necessary documentation (such as letters of reference, academic transcripts, etc.) as stipulated by the Service and the matching program.

2. Graduate School

Residents in the Department of Veterinary Clinical Sciences are all Graduate Students pursuing MS or PhD degrees. As Graduate Students they must meet admission requirements to The Ohio State University Graduate School as well as admission requirements of the Comparative and Veterinary Medicine Graduate program, without exception. Current admission requirements include a minimum 3.0 GPA during undergraduate and professional (veterinary degree) studies, a minimum 3.3 GPA for all graduate coursework, and submission of the results of the GRE (Graduate Record Examination). Foreign applicants must meet the Graduate School admissions requirements for the Test of English as a Foreign Language (TOEFL) (a score of 550 for the paper-based test, 213 for the computer-based test, or 79 for the internet-based test) or MELAB (a score of 82 is required).

NOTE: International students applying for the combined residency and graduate programs in VCS may be exempt from the requirement for completion and submission of the GRE. Any international student who has completed the GRE prior to application must still submit their scores however.

Prospective Residents and Faculty Advisors should note that these admission requirements are subject to change. Graduate Students in the Department of Veterinary Clinical Sciences must meet the admission requirements of the Comparative and Veterinary Medicine Graduate Program and The Ohio State University Graduate School that are in place at the time of application for admission to the Graduate School.

3. Equal Opportunity

The Ohio State University is an Equal Opportunity/Affirmative Action Employer. Qualified women, minorities, Vietnam-era Veterans, disabled veterans, and individuals with disabilities are encouraged to apply.

4. International Candidates

Offer will be contingent upon obtaining an approved work authorization (visa) that will allow you to report to The Ohio State University Department of Veterinary Clinical Sciences for the beginning of your residency no later than July 15.

If you are not presently authorized to work at The Ohio State University, it is important that you inform our Department of any special circumstances or concerns as soon as possible. The Office of International Affairs (OIA) at 614-292-6101, will assist us with immigration processing as needed. This Department must make the first contact with OIE before you can receive immigration guidance.
F. EMPLOYMENT AND BENEFITS

1. Health Insurance and Benefits

Residents are provided with health insurance and other benefits. Residents are classified as Graduate Research Associates (GRAs) until the end of the Spring semester of their 3rd year, and as Clinical Instructors - House Staff for the time period between graduation and the end of the residency.

Benefit information for Graduate Students can be found at: http://hr.osu.edu/hrpubs/ben/overviewbookga.pdf

Benefit information for Clinical Instructors - House Staff can be found at: http://hr.osu.edu/hrpubs/ben/overviewbook.pdf

4. Travel Policies and Process

As a state institution, The Ohio State University is required to abide by federal and state requirements for University business travel that is to be reimbursed. The complete policy on travel is available at http://busfin.osu.edu/FileStore/PDFs/211_Travel.pdf. Residents are required to adhere to this policy.

The information provided below is not all inclusive, and University policy or administrative staff should be consulted when questions arise.

All travel time and anticipated travel expenses must be pre-approved. This is accomplished by completing both the “Request for Leave – Residents” form and the “CVM Travel Estimate” form. The forms can be found in bins on the wall outside room 1008. Both forms should be completed at least 30 days prior to your intended travel. The “Request for Leave – Residents” form should be completed and all signatures obtained prior to the form being turned into the Assistant to the Chair in room 1008 who will secure the signature of the Chair. A scanned copy of the request will be returned to you via email. The “CVM Travel Estimate” form requires that you provide a chartfield. Chartfield information can be requested from the department fiscal personnel, Dan Aldworth or Debra Henrichs in room 1101. If your service is providing support for your travel, please check with the service head about the funding source and obtain their signature on the form.

All travel is processed by the CVM Shared Business Center (SBC) located in room 04 VMAB. To request that a travel be processed send an email to cvmsbc@cvm.osu.edu and attach the signed “Request for Leave – Resident” and “CVM Travel Estimate” forms. Some expenses can be prepaid (see below). To request prepayment be sure to check the box at the top of the top of the worksheet “SBC to make arrangements.” The SBC will make the arrangements requested and generate a travel request or T#. The travel request is routed to the department's fiscal manager for approval. Upon approval, the traveler is emailed a T#. The T# is your authorization to travel.

Pre-Paid Expenses

There are two travel expenses that can be pre-paid for you, registration and airfare. Other expenses such as hotel, meals, and rental car must be paid by you and then reimbursed to you after completion of the trip. If you choose to pay registration or airfare yourself, then that expense will not be reimbursed to you until after the trip. The University expects that you will incur the lowest reasonable travel expenses. For instance, if you want to drive your own car, the expense must be less than economy airfare or the cost to rent a car for the trip.

Registration – To prepay your registration, the SBC will need to be provided with a completed registration form. The form can be scanned and attached to the email you send to the SBC. If you must register on
line you may either provide the registration link and necessary passwords to the SBC in your email or you can visit the SBC, located in room 04 VMAB, to obtain the PCard (University credit card) to pay your registration.

Airfare – When pre-paying airfare, you will be required to use the University-approved travel agents. You can provide your preferred flight information in your email. If you do not provide preferred flights the SBC will contact you. While you can use Expedia, Kayak, Travelocity or other travel web sites to select preferred flights, the travel must be booked through the approved University travel agent. The SBC will contact the University travel agent to book the flight, obtain the cost for the flight, and confirm the booking with you. You will be charged $30 to use the University approved travel agent.

Other Expenses

On the CVM Travel Estimate form, you will be asked to provide estimated costs for hotel, per diem, and any other anticipated expenses. It is important to provide accurate estimates of your travel as the actual cost of your trip cannot exceed your estimate by more than 20%. You will be reimbursed for actual expenses supported by original receipts after returning from the trip.

Upon completion of your trip, you will be required to complete a Travel Reimbursement Worksheet. Copies of this form can be found outside room 1008. Submission of original itemized receipts that indicate payment of the bill are required for hotel, rental car, airfare or registration (if purchased by traveler), and other expenses over $25.

Hotels will often put an invoice under your door on the day of checkout. While this receipt is itemized, there is no evidence that the hotel bill was paid and it will not be accepted for reimbursement. Always check out at the hotel desk and ask for an itemized receipt that reflects payment of the bill. The University will not reimburse for personal items on your hotel bill such as movie rental, clothes cleaning or room mini-bars. The University will also not reimburse for additional charges due to double occupancy. If you are sharing a room and splitting the cost, ask the hotel if they can charge each occupant their share of the bill and provide a receipt for each party. If this is not possible, then one person should pay the hotel bill and request reimbursement but indicate that the room was shared. Do not pay an individual for your share of expenses as the University will not reimburse for those payments. You will be paid a per diem for your meals and incidentals (service tips to housekeeping, porters, subway fares, etc). The per diem rate is based upon the city you are visiting and is set by the federal government. No receipts are required for per diem reimbursements. The per diem will be reduced proportionately for meals that are provided by the conference or en-route on the airline.

Other expenses that are reimbursable include: baggage fees, internet connectivity, and taxi. Original itemized receipts are required for any expense in excess of $25, and are encouraged for any expense (except meals) being submitted for reimbursement.

Requests for reimbursement must be submitted within 90 days after the travel is completed. Under no circumstances will requests for travel reimbursement be honored once the Resident has terminated his/her employment with the University.

Expenses that will not be reimbursed

- First class airfare
- Expenses being paid by a third party
- Mileage for driving your own automobile, unless it is less expensive than economy airfare or a rental car (mileage reimbursement is based on the federal rate and includes fuel, vehicle wear and personal auto insurance)
- Insurance on rental cars other than damage waiver, collision damage waiver, loss damage waiver, and liability insurance
• Hotel expenses for friends or family who are sharing your hotel room.
• Personal items on a hotel bill (movie rental, clothes cleaning, mini-bars, etc.)

Please note that the State of Ohio Ethics Commission does not permit you to earn frequent flyer miles, hotel points or participate in any other award programs while on University travel unless you maintain a log and can provide evidence to an auditor that those awards were used for University travel.

2. Resident Travel Grant

The Veterinary Medical Center seeks to foster dissemination of scientific knowledge contributed by residents during the course of their specialty residency/graduate degree programs and to support resident educational opportunities. As such, the VMC will provide funds to Residents/Graduate Students in Veterinary Clinical Sciences as a Travel Grant ($1,000 maximum over the 3-year appointment) to defray costs incurred by the resident for these purposes. The $1,000 may be used for travel expenses to one or more approved meetings or educational opportunities.

The Travel Grant is intended to support travel expenses to:
- A scientific meeting where the resident is presenting an abstract of their research performed during the residency/graduate studies.
- Complete mandated specialty college training requirements
- Mandated specialty college boards preparation courses
- Annual meetings of the residents specialty college

Reimbursements may cover airfare or other transportation, meeting registration, hotel accommodations and per diem expenses. Residents are required to adhere to all University policies regarding travel (see below 4. Travel Policies and Processes).

The procedure for using Travel Grant funds is detailed in section 3, “Travel Policies and Processes”.

NOTE:
Some services provide additional funding support to their residents for travel to meetings – please speak to the faculty in your service.

3. Leave Policy

Paid and unpaid time off for Residents is based on their classification in the University system. Residents are classified as Graduate Research Associates and as such must adhere to the policies and procedures of the Graduate School, the College of Veterinary Medicine, and the Department of Veterinary Clinical Sciences.

Department Provided Benefits

This policy only addresses leaves of absence that are provided and administered by the Department of Veterinary Clinical Sciences. Leave provided by the Department of Veterinary Clinical Sciences is a privilege and not an entitlement. Clinical service needs (patient management, client care, referring veterinarian service and professional student education), the performance of the individual requesting leave and, for professional and educational leave, the educational value of the meeting or off-site training will be considered.

Department provided leaves of absence are further divided into personal, professional, educational, and illness/injury leaves that are defined below. Personal, professional, and educational leave categories
contribute to the 24 weeks allocated to off-clinic time (i.e. illness/injury does not contribute to the 24 weeks).

**Personal leave** refers to any time away from assigned duty for vacation or personal business. Days taken for short-term illness are not included in the personal leave allocation. Ten days of personal leave will be allocated each year for Residents. Residents may carry forward a maximum of 5 days not used in the current year (i.e. 10 days for the current year and 5 days carried forward if not used in the previous year).

**Professional leave** refers to any time away from assigned duty for approved scientific meetings related to the Resident’s specialty or research, elective educational experiences at remote locations or, in the final year of training, for job interviews. Residents will be allocated 15 days of professional leave to be used over the course of their three-year training program. Residents should work with their Academic Advisor and/or Service Head to develop a three-year professional leave plan early in their employment. When professional leave is exhausted, then personal leave may be requested.

**Educational leave** refers to any time used to conduct research at facilities outside of OSU, fulfill mandatory specialty college training requirements at off-site facilities, attend mandated Boards preparation courses, or to take Board examinations (general or certifying) inclusive of examination days and reasonable travel time (but does not include time off to study for examinations). If a Resident can demonstrate compelling reasons to attend additional scientific meetings (other than the elected/agreed upon meeting for which they use Professional leave) such as to present an abstract, meet with potential collaborators for research, or attend a mini-course relevant to their research, then they can also request that this be included as Educational Leave. Approval of Educational Leave would require completion of the “Additional Information” section of the Request for Leave – Residents form, Advisor and Service Head approval, and prior discussion and approval by the Department Chair. Educational leave is additional time allotted beyond the 15 professional days. As the need for Educational leaves and, when necessary, the duration of Educational leave are variable between Residents, there is no defined time for Educational leave. The granting of Educational leave is ultimately at the discretion of the Department Chair.

**Illness/Injury leave** refers to any time away for short-term or long-term absences.

- **Short-term absence is generally one to two days in length for illness or bereavement.** Completion of the “Request for Leave – Residents” form would be required upon return. Appropriate documentation (e.g. letter from a medical practitioner) is required for absences of more than 3 days. Multiple requests for leave in excess of a total of two weeks over the course of the residency may impact academic progress and require additional documentation and/or approval.

- **Long-term/Leave of absence** is for a personal serious health condition or to care for an immediate family member with a serious health condition.

  - Medical documentation is required in cases of leaves of absence for medical/family reasons
  - Definitions of serious health conditions or immediate family members can be found on the back of the Request for Leave – Residents form
  - Residents must have completed two consecutive semesters as a GRA paid through the Ohio State payroll prior to the date a leave of absence is to commence
  - The stipend and appointment as resident/graduate student will be maintained for up to 6 weeks, or until the last day of appointment, whichever comes first. Any continued absence after 6 weeks will result in termination of the appointment.
Reasonable progress toward obtaining the degree and good academic standing are required to be approved for a leave of absence. All requests must be approved by the Resident’s Advisor, Service Head, and Department Chair. In most instances, full-time registration is also required. Requirements for full-time enrollment may be reduced with approval of the appropriate Graduate Studies Committee, the Graduate School, and other relevant entities (Office of International Education, funding agency, etc.)

It is expected that leave will be requested as far in advance as possible, but no later than 30 days prior to the first day of leave requested. All leave must be pre-approved and taken when off clinical service (except emergent leave such as illness or bereavement). If leave must be taken while on clinical service, it is the responsibility of the person requesting the leave to identify and arrange coverage by an appropriate replacement clinician (other Service Resident, instructor, or Faculty clinician not on service at that time) so that there is no negative impact on patient management, client care, and clinical education responsibilities and duties provided by the Service.

**Procedure – Department Leaves of Absence**

1. Thirty days prior to the anticipated leave the person requesting the leave will complete the Department’s “Request for Leave – Residents” form that has been appended to this policy. Forms are also available outside of the Department Administrator’s office, room 1008 VMC.

2. The individual requesting the leave will submit the “Request for Leave – Residents” form to their Academic/Clinical Advisor and Faculty member on Clinical Service (if absence occurs when on clinical service) for signature.

3. The signed “Request for Leave – Residents” form is submitted by the individual requesting the leave to the Service Head for signature.

4. The Service Head signs the “Request for Leave – Residents” form to indicate approval of the request.
   a) A copy of the “Request for Leave – Residents” form is retained by the Service Head
   b) The original “Request for Leave – Residents” form is forwarded to the Department Chair for approval and signature

5. If the Service Head denies the request, the Service Head will advise the requestor of the denial.

6. The Department Chair will sign the “Request for Leave – Residents” form to indicate approval of the request.
   a) The original form will be filed in the Department office and the absence will be recorded in the Department log
   b) A scanned copy of the form will be emailed to the requestor

7. Department Chair denies the request, the “Request for Leave – Residents” form will be returned to the Service Head who will advise the requestor of the denial.

**5. Licensure**

The Ohio Revised Code requires all veterinarians within the College to hold a current Ohio license to practice veterinary medicine. A limited license is sufficient for all professional activities carried on within
the College. Holding a limited license restricts you to engage in the practice of veterinary medicine only to the extent necessary to fulfill your employment obligations. Conditions of employment are contingent based upon your eligibility to obtain and maintain the minimal state requirement of a limited license. If at anytime you lose eligibility to be licensed, your employment with the University will be at risk. More information on licensure can be found at http://ovmlb.ohio.gov/licensing.stm or by contacting the Department office.

The application process for limited licensure is coordinated by the Department office and will be reviewed during orientation. First time applicants will be required to be fingerprinted and submit to a background check. Arrangements for the background check will be made by the Department. All fees associated with licensure will be paid by the Veterinary Medical Center.

6. Authorization to Work Requirements

The University is required by Federal law to verify the identity and work authorization of all new employees. This verifies you are either a US citizen or eligible to work in The United States. Accordingly, the offer of a residency position is contingent upon such verification. You will be asked by a representative of the Department to complete the Form I-9 (Employment Eligibility Verification form) no later than your first day of work. Information on the Form I-9 and acceptable forms of identification can be found at http://www.ohr.ohio-state.edu/forms/emp/i-9.pdf.

7. Self-Disclosure of Criminal Convictions and Fraud Reporting

As part of the revised Self-Disclosure of Criminal Convictions and Background Check Policy, please note that effective July 1, 2011, all current faculty, staff, graduate associates and student employees, appointees, volunteers, and staff provided by third party vendors will be required to self-disclose criminal convictions that occur on or after July 1, 2011 within three business days of the conviction.

Pursuant to Ohio Revised Code 117.103(B) (1), Ohio State is required to provide information about the Ohio Fraud Reporting System and the means of reporting fraud to each new employee upon employment. A copy of this legislation will be included in your new hire packet and should be returned signed within 30 days after beginning employment to confirm receipt.

G. GRADUATE PROGRAM

Residents in the Department of Veterinary Clinical Sciences are typically required to undertake studies for an advanced degree, either an MS or PhD. All graduate programs at The Ohio State University are under the auspices of the Graduate School and are governed and administered by the Council for Graduate Studies of the College of Veterinary Medicine. Residents are directed to the handbooks of each of these bodies for guidance and details of the graduate program (see links below).

Residents who enter a residency program with a prior MS degree are still expected to pursue an advanced degree (MS or PhD) in their chosen specialty field during their residency.

Residents who enter a residency program with a prior PhD in a relevant field may petition the Post Professional Education Committee (PPEC) to forego further advanced degree training during their residency. However, even if the PPEC grants this request, these Residents should be aware of the following 2 points:

- Residents with a PhD are expected to pursue and complete a research study at the level expected of an MS thesis during the course of their residency.
Residents with a PhD are expected to attend any graduate courses that they would normally attend, and that are pertinent to their Resident training and Specialty Service (under direction of their Academic Advisor).

1. **OSU Graduate School Handbook**
   

2. **College of Veterinary Medicine Graduate Handbook**
   
   [http://vet.osu.edu/assets/pdf/education/graduatePrograms/cvmGraduateProgramHandbook](http://vet.osu.edu/assets/pdf/education/graduatePrograms/cvmGraduateProgramHandbook)

3. **VCS Graduate Course Grids**
   
   The overall 3-year course grid (listing core graduate courses offered in VCS) and individual quarter course grid (listing all courses offered in that semester) can be found at:
   
   [http://vet.osu.edu/assets/pdf/education/graduatePrograms/vcs/vcsGraduateCourseGrid.pdf](http://vet.osu.edu/assets/pdf/education/graduatePrograms/vcs/vcsGraduateCourseGrid.pdf)

4. **VCS Graduate Course Requirements**
   
   a. **Didactic Graded Credit Hours**
      
      Residents in MS or PhD programs must successfully pass and complete 20 didactic graded credit hours of graduate courses as a requirement for completion of their degree.
      
      The required credit hours are typically fulfilled through courses offered in the Department of Veterinary Clinical Sciences (see VCS Graduate Course Grids above) and by service specific didactic courses. However, some Residents/Graduate Students participate in courses in other departments of CVM or in graduate courses in other colleges of the University where such courses are deemed to be advantageous to the scholarly education of the student. The student will discuss with their Academic Advisor a desirable plan for completion of the graduate credit hour requirement during the course of their program.

   b. **Veterinary Core Communication Skills Competency**
      
      All incoming Residents in the Department of Veterinary Clinical Sciences will attend the course Veterinary Core Communication Skills Competency, offered shortly after the commencement of the residency program. Exemption may be considered for Residents who have completed a similar formal structured course during their internship or during the course of their professional (DVM) degree, or who have completed the Bayer Animal Health communication training or similar such workshop in the past. Residents seeking exemption should submit a letter to the course team leader (currently Dr. Tony Buffington) detailing the formal structured course previously attended and completed.

   c. **Research Methods/Biostatistics Course Requirements for ALL Clinical Residents and Graduate Students in the Department of Veterinary Clinical Sciences**.
      
      All residents and graduate students in VCS will be required to complete at least 3 semester credit hours of graded graduate level statistics. This will include:
      
      Mandatory:
• Research Methods and Grantsmanship (RMG) – 1 S hr

Any 2 of the following 3 courses (elective):
• Clinical Epidemiology (CE) – 1 S hr
• Experimental Design & Data Analysis 1 (ED1) – 1 S hr
• Experimental Design & Data Analysis 2 (ED2) – 1 S hr

Notes:

1. Students may choose to complete all 3 elective courses (CE, ED1, ED2) in addition to RMG.
2. Successful completion of ED1 is a prerequisite for enrolment in ED2 (students with a background in biostatistics may petition the team leader of ED2 for an exemption from this rule).
3. Students who already have graduate degrees and have completed graduate level biostatistics courses may petition the PPEC to be excused from the requirement to complete some or all of the 3 credit hours of statistics. It will be incumbent on the student to provide a copy of the formal syllabus of previously completed courses and a copy of their academic transcript indicating the grades for each course.
   **Successful petition to be excused from this VCS requirement does not in itself confer transfer of credits towards the required graduate credit hours. The necessary paperwork needs to be completed and the Graduate School Advisory Committee must approve any request for transfer of credits.
4. Students who intend to complete biostatistics courses in other colleges or on OSU main campus, may petition the PPEC to be excused from the requirement to complete some or all the 3 credit hours of statistics in VCS. It will be incumbent on the student to provide a copy of the formal syllabus of the intended courses to PPEC for their consideration.

H. TIME OFF CLINICS

Each resident must be afforded time off clinics on a regular basis to pursue scholarly activities. As graduate students pursuing advanced degrees to develop, conduct and complete research, and in recognition of the need for time to establish expert knowledge, each resident must be granted a minimum of 24 weeks off clinic time during the course of the 3-year program, with a recommendation for a minimum of 5 weeks off clinic time annually. Some specialty services may provide additional time off clinics and residents are referred to their Specialty Service Resident Program Handbook.

Personal Leave, Professional Leave and Educational Leave (see section F.4 of this handbook) contribute to the 24 weeks off clinic time. Thus, if a resident utilizes all of their Personal Leave (10 days per year for a total of 30 days over 3 years) and all of their Professional Leave (15 days over 3 years) this leave will account for 9 weeks of off clinic time (considering a “typical” 5 day working week); 15 weeks would thus remain for off clinic time in pursuit of scholarly activities. Note that Leaves of Absence for personal injury/illness (see section F.4 of this handbook) do not contribute to the 24 weeks off clinic time.

Residents should note the following points relative to off clinic time:
• Time off clinics must be discussed and approved by the individual specialty service faculty such that clinical service, duties and responsibilities to the VMC are not adversely affected.
• During off-clinic time, residents are expected to:
  o be present at the University each day
  o be actively engaged in activities contributing to the successful completion of their educational program and the academic missions of the Department, VMC and service
  o be available by VMC telephone.
• If residents are absent from the College of Veterinary Medicine, appropriate Personal, Professional or Educational Leave of Absence requests must be completed and approved prior to the absence (see Section F.4).
Residents are expected to provide all assigned emergency duty services during off clinic time in those Specialty Services requiring this unless appropriate arrangements have been made.
Residents must check-in and remain available daily for telephone messages during off-clinic time.
Residents are expected to attend classes of graduate courses in which they are enrolled during off clinic time unless prior approval from the course instructor(s) is obtained.

In individual circumstances, all residents are allowed to petition their service and advisor for additional time off clinical service (in excess of 24 weeks as outlined above).

Points of note regarding additional time off clinics include:

- There is no prescribed additional time off clinics allocation.
- Additional time off may be granted for appropriate training or scholarly activities as determined by the resident's service faculty.
- Any additional time off requested cannot affect the continuation of full clinical services provided by each specific section or the Veterinary Medical Center. This should include assigned emergency duty for those services/specialty colleges requiring this of each resident.
- Residents must still comply with and fulfill their specialty college training guidelines. Any additional time off requested will be considered in light of these requirements.
- The resident's performance in all aspects of their program will be considered in the request for additional time off.
- Requests for additional time off may vary between residents in the same service, or between residents in different services.

Requests for additional time off clinics:

- Requests for additional time off must be submitted in writing, indicating the amount of time requested, dates of time off requested, reason(s) for additional time of requested, and what will be accomplished/achieved during this time. Residents should provide reasonable justification for the request.
- Residents should work with their residency advisor and service head in the preparation of each request and provide reasonable justification(s) for each request in the documentation.
- The request for additional time off clinics should be provided to the resident's advisor and service head for approval and signatures.

Appeal of denied request for additional time off:

- If a request for additional time off clinics is denied, the resident may choose to appeal the decision to the Chair of the Department of Veterinary Clinical Sciences for additional consideration.
- In consideration of the denial of additional time off clinics, the Chair will request the service specific faculty rationale for denying this request in writing to the resident and Department Chair.
- The decision of the Department Chair will be final.
I. RESIDENT PERFORMANCE EVALUATIONS

1. Introduction

The goal of the Resident Performance Evaluation is to ensure that our Resident colleagues successfully complete their programs in a timely manner. The evaluations provide the constructive feedback and reinforcement of desired skills and attitudes that motivate Residents to continued excellence. Moreover, if problems of performance arise they can be addressed and attempts made to resolve them in a timely manner. **The following are minimum requirements for the evaluation of Resident performance.** More frequent evaluations may be performed at the discretion of the Resident's Advisor(s), Service Head, Department Chair, or the Post Professional Education Committee of the Department. Residents are expected to ask for performance reviews as frequently as necessary to assure satisfactory progress.

Residents and Graduate Students must adhere to The Ohio State University “Code of Student Conduct” (section 3335-23), the Ohio Veterinary Practice Act, and other applicable Department, College, University, State, and Federal rules and regulations.

A. Informal guidance – Residents should receive informal feedback on their performance from Faculty members as a regular part of their interaction.

B. Service performance review – All Residents will be evaluated by their supervising Service Faculty by the first Monday in December of the first year of their residency (approximately 4.5 months after the commencement of the residency), and then bi-annually (Autumn and Spring semester) thereafter. Residents may be evaluated more frequently than stipulated by this schedule. The evaluation will include:

1. Completion of the Resident Performance Evaluation by supervising Faculty. (See attached). The evaluation includes assignment of scores relating to performance in eight categories (See below), as well as written summaries relating to performance in each category and general indicators of performance and future expectations at the end of the form. The composite scores and final evaluation form will be discussed and decided at a meeting of all supervising Faculty. Service Faculty who cannot attend the discussion must provide their input by completing the Resident Performance Evaluation form. The information provided will be included in the discussion.

2. A personal interview with the Resident attended by the Service Head, and the student's Research Advisor and Clinical Advisor.

The Resident has 1 (one) week to consider the evaluation and either sign it (in acceptance) or provide a written rebuttal of the evaluation if desired. If a rebuttal is submitted, the Service Head and the Resident’s Advisors will meet to consider the rebuttal and provide a response to the Resident within 1 (one) week of submission of a rebuttal. The Resident Performance Evaluation form, rebuttal (if provided), and a response to the rebuttal are to be signed by the Resident and Service Head, with electronic copies submitted to:

- Department Office (Education Program Coordinator – Amy Shaw)
- Resident
- Resident Clinical Advisor
- Resident Research Advisor
- Service Head
- Chair of the Department’s Post Professional Education Committee
**Evaluation Appeal Process:** The Resident may appeal the evaluation and response to their rebuttal to the Department Chair and the Chair of the Post Professional Education Committee; the rebuttal and response procedures described above must have been completed. The appeal must be submitted in writing within 1 (one) week of the Resident receiving the response to their rebuttal. The appeal must include the specific grounds for the appeal and should provide supporting documentary evidence, as appropriate. The Department Chair will decide on the course of action within 1 (one) week of receiving the appeal.

**Review of Procedures:**

![Diagram of evaluation process]

2. **Evaluations**

Performance Evaluation forms include the following categories: Clinical Ability, Knowledge, Interpersonal Skills and Professional Conduct, Teaching Ability, Clerical and Managerial Skills, Research, Coursework, and Publication Productivity, Attendance and Participation at Conferences, and Service-Specific Criteria. Residents are evaluated on the extent to which they meet the performance expectations, at that stage of their program, according to the following scale:

- **5 = Well above** – Resident’s performance continuously exceeds minimum standards expected for a Resident at that stage of the training program
- **4 = Above** – Resident’s performance always meets and frequently exceeds minimum standards expected for a Resident at that stage of the training program
- **3 = Meets** – Resident’s performance always meets minimum standards expected for a Resident at that stage of the training program
- **2 = Below** – Resident’s performance is below minimum standards expected for a Resident at that stage of the training program
- **1 = Well below** – Resident’s performance is well below minimum standards expected for a Resident at that stage of the training program
- **NO = Not observed**
- **NA = Not applicable**
3. **Guidelines for Probation**

Continuation in the program on unrestricted status is contingent upon favorable performance. Although probation can be imposed at any time, it usually results from problems identified during a regularly scheduled performance review conducted by the Service or group of supervising Faculty. Individual Faculty can request out-of-cycle reviews of a Resident’s performance by the Service, or group of supervising Faculty. This request should be made to the Service Head, or the Resident’s Advisor. We define unsatisfactory performance as a composite score (i.e. overall score awarded by the Service, or group of Faculty evaluating the Resident) of < 3 in any one or more of the categories of evaluation above or based upon unresolved concerns raised at section discussions of the individual Resident’s performance or at the personal interview. Residents receiving an unsatisfactory evaluation will be placed on probation. Probation will be announced to the Resident at the time of the personal interview (See Section I.1.B.2. above), through the evaluation, and by probationary letter. Copies of the evaluation and probationary letter must be submitted to the Department Chair and the Chair of the Post Professional Education committee prior to the personal interview. The probationary letter will include:

1. A summary description of the inadequacies that led to probation.
2. Specific directions (when possible) and timetable for correcting inadequacies.
3. Dates for the 6-week and 12-week reevaluation while on probation.

The Resident has 1 (one) week from the date of the personal interview to provide a written rebuttal of the evaluation and probationary letter if desired.

- If the Resident accepts the evaluation as is and will not be submitting a rebuttal, the evaluation and probationary letter must be signed by all parties within 1 (one) week of the interview. The 12-week probationary period will begin on the day that the evaluation and probationary letter are signed by the Resident.

- If the Resident provides a rebuttal, all Service Faculty must meet to discuss the rebuttal and respond to the Resident by letter within 1 (one) week of the date of submission of the rebuttal letter. It is anticipated that both parties should meet to discuss the final decision within this 1-week period as well.
  - If the original decision for probation is upheld, the 12-week probationary period will commence on the day that the letter of response is delivered to the Resident.
  - If the original decision for probation is overturned, then the original evaluation should be amended and signed by the Resident, Service Head, and Advisors.

- The Resident Performance Evaluation form, probationary letter, rebuttal (if provided), and response to rebuttal are to be signed by the Resident and Service Head, with electronic copies submitted to:
  - Department Office (Education Program Coordinator – Amy Shaw)
  - Resident
  - Resident Clinical Advisor
  - Resident Research Advisor
  - Service Head
  - Chair of the Department’s Post Professional Education Committee
**Probationary Appeal Process:** Residents may appeal the evaluation and probationary status to the Department Chair and Chair of the Post Professional Education Committee.

**Review of Probation Procedures:**

![Flowchart of Probationary Appeal Process]

**Removal of Probationary Status:** Return to unrestricted status will depend upon substantial improvement in performance, which means receipt of favorable written evaluations 6 and 12 weeks after the initial unsatisfactory evaluation. Substantial improvement means improvement of all previously unsatisfactory ratings to a score of 3 or higher, and/or resolution of problems identified at section discussions and interviews. Performance of Residents on probation will be reviewed regularly at meetings of the appropriate Faculty (Service Faculty, or group of responsible Faculty) during the 12-week probationary period.

If substantial improvement does not occur at both the 6-and 12-week evaluation periods, the Resident will be dismissed after the second evaluation (12 weeks after the initial unsatisfactory evaluation). If the 6- and 12-week evaluations are satisfactory, the Resident will be taken off probation.

If improvement is evident, but not adequate, the Resident may be kept on probation for an additional 12 weeks. If substantial improvement occurs during this extended probationary period, the Resident may resume normal status. If substantial improvement does not occur during this extended probationary period, the Resident will be dismissed. A Resident may be placed on probation at any subsequent evaluation period.
Examples of reasons for a Resident being placed on probation or dismissed from the program include, but are not limited to:

1. Failure to provide the expected standard of care

2. Uncollegial behavior. Collegiality, mutual support, and respect for others are strongly held values in the College of Veterinary Medicine. We support diverse beliefs and the free exchange of ideas and expect that Faculty, Residents, staff, and students promote these values and apply them in a professional manner in all academic endeavors

3. Behavior that reflects badly on the veterinary profession, The Ohio State University, the College, and/or colleagues

4. Neglect of duty, including but not limited to:
   a. Not attending and participating in ward rounds and compulsory conferences (grand rounds, etc.)
   b. Absence from scheduled emergency duty
   c. Absence from regularly-scheduled appointments
   d. Inadequate client communication
   e. Failure to complete bills and medical records in the prescribed time frame and fashion

5. Negligence, incompetence, and reckless behavior toward people, patients, or equipment

6. Failure to comply with directives issued by the Department Chair, Hospital Director, Post Professional Education Committee, Service Head, or Advisor(s)

7. Failure to comply with Department guidelines regarding outside employment

8. Academic misconduct and/or dismissal from Graduate School

9. Abuse of prescription or non-prescription drugs, alcohol, or other substances

10. Physical or mental limitations that interfere with the Resident’s performance that cannot be remedied by reasonable ADA-approved accommodations

11. Failure to comply with OSU policies on sexual harassment, consensual relationships, or discrimination

12. Other deficiencies identified by the performance evaluation that identify unsatisfactory performance

During periods of probation, the Resident will work under the direct supervision of a Faculty member, and will be expected to make considerable improvement in the identified areas of deficiency.
4. **Guidelines for Dismissal**

The following constitute grounds for dismissal from the residency program:

- Gross misconduct or unprofessional behavior
- Any criteria outlined under reasons for probation
- Egregious behavior that reflects poorly upon the University, the veterinary profession, or both
- Violations of the Ohio Veterinary Practice Act

**Dismissal Appeal Process:**
Residents placed on probation or dismissed can appeal to the Department’s Post Professional Education Committee and the Chair of the Department of Veterinary Clinical Sciences. The appeal must be submitted in writing within 1 (one) week of the Resident receiving written notification of their probation or dismissal. The appeal must include the specific grounds for the appeal and should provide supporting documentary evidence, as appropriate. The Department Chair will decide on the course of action within 1 (one) week of receiving the appeal.

There may be other appeal mechanisms available to the Resident, depending on the particular circumstances. The Resident’s Advisor, the Chair of the Post Professional Education Committee, and/or the Chair of the Department of Veterinary Clinical Sciences can advise the Resident on these options.

5. **Evaluation Timeframe**

Residents must be evaluated in the Autumn and Spring semesters of each year of their program, beginning in the Autumn semester of the first year. **Completed and signed evaluation forms must be deposited in the Department Office by December 1st or the first working day after December 1st of each year for the Autumn semester evaluation, and June 1st or the first working day after June 1st of each year for the Spring semester evaluation.**

**Note:** If Resident Performance Evaluations are not submitted by the above deadlines, the Service Chief will be sent email reminders and a formal reminder letter (cc’d to the Department Chair and Chair of the Post Professional Education Committee) that the evaluation must be completed and submitted within 30 days. Failure to comply with this deadline may affect the ability of the Service to recruit and mentor future Residents.
J. CODES OF CONDUCT
Residents in the Department of Veterinary Clinical Sciences are subject to:

OSU Student Code of Conduct 33325-23: http://studentaffairs.osu.edu/csc/

Ohio Veterinary Medical Licensing Board: http://ovmlb.ohio.gov/

K. CONFLICT OF COMMITMENT
Residents are subject to the Conflict of Commitment Policy (approved by the Board of Trustees 07/08/05) that states:

“A conflict of commitment exists when external or other activities are so substantial or demanding as to interfere with the individual's teaching, research, scholarship or service responsibilities to the University or its students.”

Residents are subject to the Financial Conflict of Interest Policy for Faculty (approved by the Board of Trustees 07/10/98) that states:

“A conflict of interest exists if financial interests or other opportunities for tangible personal benefit may exert a substantial and improper influence upon a Faculty member or administrator’s professional judgment in exercising any University duty or responsibility, including designing, conducting or reporting research.”

- A University employee may not accept compensation for the performance of his or her University duties from any person or entity other than the University.

Residents should also be aware of the University Policy on Patents and Copyrights that states:

“This policy reaffirms the University’s right and policy, consistent with applicable law, of ownership of all legal rights in products of University research and establishes procedures and guidelines to assure the responsible exercise of that right.”

Residents are also subject to the following Department of Veterinary Clinical Sciences policies:

- Residents are not permitted to practice veterinary medicine in any capacity during the course of their residency, outside of the duties and responsibilities towards the University as defined by their Specialty Service.
- Residents are not permitted to provide paid external consulting services to industry, businesses, foundations, boards or other groups during the course of their residency.
- Residents may provide paid Continuing Education lectures and presentations during their residency subject to approval by the Specialty Service Head and the Department Chair.
- Residents must have a Request for Leave – Residents form completed and approved before leaving to attend any off-campus professional duty or activity.

L. STATEMENT OF COLLEGIALLY
Collegiality, civility, mutual support, and respect for others are strongly held values in the College of Veterinary Medicine. We support diverse beliefs and the free exchange of ideas and expect that Faculty, staff, and students promote these values and apply them in a professional manner in all academic endeavors. The College is committed to evaluating the practice of these values as part of Faculty performance evaluations.
