POULTRY MEDICINE WORKSHOPS

Learn the knowledge and skills necessary to receive poultry clients.

Veterinary Extension at The Ohio State University is pleased to offer three separate “Poultry Medicine Workshops” to be held in the general vicinity of the Cleveland, Columbus, and Cincinnati-Dayton metropolitan areas. Each one-day program consists of lecture followed by a wet lab in the afternoon. The program is coordinated by Dr. Mohamed El-Gazzar, OSU Poultry Extension Veterinarian, with instructors consisting of various poultry experts. The purpose is to introduce veterinary practitioners in small animal and mixed animal practice to poultry medicine. The goal is to provide veterinarians with the necessary knowledge, skills, and resources to accept poultry clients. Noncommercial and urban backyard poultry producers are a growing and underserved population that will require more veterinary involvement in the future. The program agenda and more information is available online at: http://go.osu.edu/poultry_medicine

CHOOSE YOUR DATE
OCT 3rd, 4th, or 5th
7:30 a.m. to 5:00 p.m.

Locations:
- Cleveland Area (Oct 3, 2017)
