Veterinary Public Health Resident / Graduate Associate
Animal Emergency Preparedness and Response

Applications are now being accepted for a Veterinary Public Health Resident / Graduate Associate position focused on Animal Emergency Preparedness and Response in Ohio. The successful applicant will participate in the Veterinary Public Health Residency, an American College of Veterinary Preventive Medicine (ACVPM)-Certified Training Program within the Department of Veterinary Preventive Medicine at The Ohio State University. The successful applicant will pursue a Master of Public Health degree in the OSU College of Public Health with a specialization in Veterinary Public Health on a part-time basis over a three-year period. As a part-time Graduate Associate, the Resident will work closely with OSU faculty members and officials at the Ohio Department of Agriculture to support a variety of Animal Emergency Preparedness and Response activities in Ohio including planning, training, and response activities. In addition, the Resident will be expected to support and contribute to the delivery of Veterinary Public Health and Animal Emergency Preparedness and Response topics in the College of Veterinary Medicine professional DVM and graduate curricula. The expected outcome of this training program is the successful completion of the MPH degree, awarding of a Veterinary Public Health Residency Certificate, and eligibility for the ACVPM Board Certification examination.

The Resident/Graduate Associate can expect to gain skills and experience in One Health competency areas, such as infectious disease epidemiology, food protection, environmental health, emergency response and preparedness, multi-disciplinary communication and coordination, and project management. Additional details regarding the Veterinary Public Health Residency training program at OSU can be found here: https://vet.osu.edu/education/veterinary-public-health-vph-program/vph-residency.

Successful applicants will have a DVM/VMD degree from an accredited College of Veterinary Medicine and will fulfill the requirements for acceptance into the OSU College of Public Health MPH degree program. Desirable characteristics of the successful applicant include excellent oral and written communications skills, teaching experience, demonstrated leadership, and the ability to work effectively in a team environment. Compensation includes a monthly stipend (subject to applicable payroll deductions) comparable to graduate students at the College of Veterinary Medicine, and tuition costs will be provided for the full duration of the program. This program will begin August 2022 and will be expected to be completed no later than May 15, 2025.

Review of applications will begin immediately and continue until an appropriate candidate is identified. Interested individual should submit a letter of application describing their qualifications and professional goals, an updated Curriculum Vita, the most recent college transcripts, and the names and contact information of three professional references at:
