

MEMORANDUM

TO: FACULTY
College of Veterinary Medicine

FROM: Patrick L. Green, PhD *Patrick Green*
Associate Dean for Research & Graduate Studies

SUBJECT: CALL FOR PALADIN PROPOSALS

DEADLINES: May 15th and November 15th

PURPOSE: The estate of Marjorie C. Martin in cooperation with the American Maltese Association has endowed the Paladin Veterinary Research Fund within the Ohio State College of Veterinary Medicine. According to the endowment designation, the income is to be used for research in diseases, defects, injuries and treatment of Maltese dogs and other toy breeds, with particular emphasis on problems with reproduction, hypoglycemia, risks of surgery, and use of anesthetics. However, as research and veterinary science advance, the need for research in the various topics may change.

APPLICATION PROCEDURES: The proposal must use the provided College application format (**updated 06/01/18**). Guidelines and template can be found at the following link on the Office of Research website [CVM Intramural Grants](#). An electronic version of the proposal must be submitted on or prior to the above quoted deadline to Michele Morscher Morscher.1@osu.edu. There is a limit of one proposal submission per principal investigator for this competition. **NOTE: Grants that do not follow the required college grant application format will not be reviewed by the Council for Research.**

BUDGET: A maximum total funding target of **\$30,000** (includes both direct and 10% indirect costs) per proposal. Do **not** budget for publication costs.

PROJECT TERMINATION: All proposals will be awarded for a maximum of two years. At the end of the award period, any residual funds will be remitted back to the main canine fund. Any extensions **must** be requested in writing to the CVM Office of Research and Graduate Studies.

REPORT REQUIREMENTS: An Interim/Final report is due annually, to be included in an annual report to the endowment and the American Maltese Association. With exception of the first year, all resident and graduate thesis projects funded by CVM intramural grants, are required to present a poster at the annual CVM Research Day. Failure to comply will jeopardize future PI eligibility for these resources.

IACUC APPROVAL: IACUC APPROVAL MUST BE IN PLACE **PRIOR** TO AN ACCOUNT BEING ESTABLISHED ON AWARDED PROJECTS.

REMINDER: Each faculty member may be principal investigator of a **maximum of two active** intramurally-funded grants at any one time.

USE OF CLIENT OWNED ANIMALS – All canine clinical studies using client owned animals, supported through CVM intramurally awarded canine funds, **and utilizing hospital research rates** will be required to be fully administered by the BBVCTO. To help offset the cost of using the CTO, up to an additional \$3,500 outside the budget cap, will be provided to support the intramural funded clinical trial. If CTO services and fees are projected to exceed this dollar amount, then the balance of funds required must be budgeted within the grant cap.

The BBVCTO is responsible for reviewing all budgets associated with studies that involve client owned animals at the VMC. Please follow the guidelines for Clinical Budget Review Process and Study Registration and the Use of Client-owned Animals in Research. You can [request a meeting](#) with the BBVCTO for budget review. This will ensure that the [budget](#) accurately reflects the proposed work and incorporates the newly instituted discounts at the VMC. A reminder that once a clinical study has received IACUC approval, the PI should register the study with the BBVCTO. The PI will receive an email/approval letter from IACUC containing a link for [Study Registration](#).

Please see the pdf: New Use of CTO Policy.01-28-23
